Post Care Instructions  
For Skin Lesions

1. Leave brown tape or dressing on until post-operative appointment
2. If brown tape falls off before your one week appointment, use peroxide to clean the area and apply Bacitracin ointment 2-4 times daily.
3. You can shower and get brown tape wet- just no rubbing the tape while it is wet.
4. Sleep with the head of your head elevated on a couple of pillows to prevent swelling.
5. Take all antibiotics if prescribed.
